**DETAILED ACTION**

Claims 10-20 are allowed.

The following is an examiner's statement of reasons for allowance: The closest art known to the Examiner is listed on the PTO 892 and IDS forms of record. None of the references anticipate or make obvious, *inter alia*, forming a gate insulation layer over the poly-crystalline semiconductor, wherein the gate insulation layer is formed with a first thickness at a channel position and at source and drain positions, wherein the gate insulation layer is formed with a second thickness at offset positions, and wherein the thickness of the gate insulation layer tapers in sequential doping positions from the second thickness to the first thickness; forming auxiliary gate electrodes over the offset positions; and impurity doping impurity doping the semiconductor layer through exposed portions of the gate insulation layer while using the gate structure as a mask to define sequential doping regions that are aligned with the sequential doping positions as required by the present claims . Therefore, the present claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
